# Metvy Data Analytics Program

Task 2

Using UK Bank Customers:

1 show gender-wise balance (use any graph)

2) create a clustered column graph to show gender, job classified, and balance

3)create a line chart and show date-wise balance with different job categories

4)create a graph and see region wise balance for the year of 2015 of Jan vs December and compare

5)create a card and see the average balance

6) Create a Card to see the average age of my data

Using Blockbuster Data:

1) Which year the highest gross earning

2) Using the data to create your own insight by making diffrent graphs and using filters
